Sigmavision Founder honoured by Invitation to The Queen's Reception celebrating UK Technology and Innovation

Her Majesty The Queen and Sigmavision MD, Dr Andrew Pryce at Reception for UK Technology and Innovation

Dr Andrew Pryce, Sigmavision's founder, attended a Reception hosted by The Queen and The Duke of Edinburgh at Buckingham Palace on Monday 9th June. Invitations were extended to 350 of the UK's most successful and most promising technology businesses by The Duke of York, a keen supporter of the UK tech industry. The Reception was also attended by The Duke of Cambridge and The Duke of Kent.

Andrew comments "The event was truly inspirational, grouping together so many like-minded technology entrepreneurs from around the UK. It's amazing how similar our journeys have been in overcoming both technology and financial hurdles to commercialise our technologies. It was also great to finally meet Iain Gray, CEO of Technology Strategy Board, who have supported our business so well via Smart funding. And what a setting for the event, the State Rooms at Buckingham Palace are truly incredible. It was an evening that I'll always cherish that culminated in a very proud moment meeting both The Queen and The Duke of Edinburgh."
